

## AGM 2021/2022

### Student Candidate Profile

**Zachea Scicluna** is a second-year mechanical engineering student, studying at the University of Malta and UESA's present Financial Officer. Having learned to properly manage her time along the years, Zachea makes the most of her time whilst studying at UoM and combines this with:

- participation in events hosted by KSU such as clean-ups, conferences on current hot topics and more.
- partaking in DegreePlus courses like Swimming, Pilates.
- improving her skills by attending other courses such as First-Aid.

As a student organisation, UESA has taught Zachea how to work in a team, take initiative, engage with different people and be more comfortable with public speaking. Being an administrative member, she learnt the inner workings of a functioning NGO and how to organise herself and work diligently – all skills which she would use and hope to grow further within the Chamber of Engineers.

By joining the Chamber, her goal is to learn directly from professionals within the engineering profession itself about the job of an engineer in this vast and ever-growing world and to ensure a steady link between students and the Chamber.
